CRITICISM POPULAR

VOLUME 59

My criticism of existing ketball rules, especially c ing the "interest - killing' published in The Clipper week, struck a popular chord Many Clipper readers congra tulated me and said they en joyed the article immensely They said it expressed their sentiments exactly. They stated that they wished sports reporters and basketball fans all over the country would start a movement to do away with the double free-shot rule. As a demonstration of the working of the double free throw penalty, the Kinston-New Brockton game played at Kinston Friday night was a fair

sample, Kinston won, 91-81, total of 77 free shots were attempted by both teams. Kinston hit 25 of 35 and New Brockton counted on 29 out of 40 Elba lost to Opp by a two point margin (free throws) i the last few seconds. A larg majority of Elba's lost game have been attributed to infer iority in ability to make foul shots. Four players fouled out. seriously weakening the teams. ## COMPARE

and you'll choose CHILEAN NITRATE OF SODA

More than anything else, when spring growth begins, small grain needs an ample supply of fast-acting nitrate nitrogen. And that means Chilean Nitrate of Soda. The nitrogen in it is 100 per cent nitrate nitrogen—fast-acting and ready to help the hungry crop through its most difficult period and push it ahead. More than 100 years of consistently satisfactory experience with ural Chilean Soda have demonstrated that there is nothing to compare with it for top-dressing small grain. It is a rare natural combina ion of nitrate nitrogen, sodium and minor elements. The nitrogen is 100 per cent nitrate nitrogen—ready to work, rain or shine, as soon as it's applied. This is especially important because at top-dressing time every moment counts. There is nothing like nitrate nitrogen for a small grain crop-and there is no source of nitrate nitrogen that can compare with Natural Chilean Soda. Then, there's the sodium and minor elements. Sodium, particularly, adds much to the value and effectiveness of Chilean Soda. It

conserves the supplies of magnesium, potash and calcium in the soil and substitutes for calcium and potash, if necessary. It increases the supply of available phosphate. Every ton of Chilean contains sodium equivalent to 650 pounds of commercial limestone to destroy soil acidity and correct acid-forming effects of ammonia nitrogen. This explains why regular, systematic use of Chilean Soda helps so much to maintain a favorable pH level for the production of top yields of top-quality crops. If you have any question about the top-dressing for your small grain crop this year, we urge you to try Natural Chilean Soda, if only in a small

and satisfactory nitrate nitrogen fertilizer you can buy for top-dressing your small grain crop

OUT ON A LIMB By Stumpy McCulloch

"This dog," a city feller told Ol' Hannibal last week, "is worth five hundred dollars."
"Shecks, I cain't believe that," replied Ol' Hannibal. "How could a dependent of the state of the s dog possibly save that much mone

to manage his 36-acre wood lor accordin' to the practices of good forestry. This lot had been stripped of all salable timber 25 years be fore, so Sam had a !ot of work to do. First he removed inferior trees, damaged trees and vines. And he's kept it up ever since!

In 20 years, this 36-acre lot has produced 400 cords of fuelwood valued at \$800 for sale and home use Sam has used 5000 board feet of lumber for buildings on his own farm, and sold another 20,000 board feet fo \$835. All in all, the 36-acre lot has returned an average of \$2.80 per acre per year during the past 20 years— on rough land that wasn't suited for crops or pasture! And now, with his wood lot in better shape than ever before, Sam still has lots of valuable

for more cash! \* \* \*
One time, Sam decided to remove some mature tulip poplar trees, to make room for younger trees. First he investigated local timber markets, and learned that prices were high and the demand good for high-quality tulip poplar for veneer. So, with the help of his for veneer. So, with the help of his son Ernest, who is active in 4-H forestry activities and had just attended Indiana's Farm Boys For estry Camp, Sam went to work.

timber that he can market each year

They selected individual trees to be marketed, picking only the mature or "ripe" ones. Then they marked these trees with an axe blaze, estimated the number of board feet, and invited timber buyers from several ompanies to inspect the marked til ber and submit competitive bids. few weeks later, they sold the trees 25 tulip poplars, containing 12,000 board feet—for \$700. I think thi proves that good marketing practices really pay off!

Ol' Zeke says he heard one cannibal ask another, "Who was that lady I seen you with last night?"
"That was no lady," said the other, "they was ready," said the other, "that was my dinner!" So long. See you so n!

# MR. FARMER: YOU WANT THE BEST IN FERTILIZER

Buy CAPITAL LOW-MOISTURE, HIGH-VALUE fertlizers. LOW-MOISTURE is essential in getting more fertilizer for less money

We highly recommend CAPITALES-MIN-EL MIXTURE - Essential Mineral Elements - for truck crops and orchards. CAPITAL ES-MIN-EL MIX-TURE used properly will produce peaches and other fruits over grade.

We recommend 0-14-14 fertilizer with Neptachlor or Aldrin for control of FIRE ANTS.

For general crops we highly recommend CAPITAL LOW-MOISTURES-8-8, 4-12-12, as well as 6-8-8 and 4-10-7.

One ton of non-acid forming CAPITAL fertilizer, containing Dolomitic Limestone, will produce 25% more cotton than one ton of acid forming fertilizer made with sand. No SAND is used in CAPITAL fer-

Sewage Problem Catching Up with Elba

It didn't take a very clairvoyant person to see the handwriting on the wall at drawing. the council meeting last Monday night. The discussion was about sewage disposal and of 28 housing units to the sewer line ser-

Mayor Herschel Taylor introduced H.

A. Baxley, county sanitation officer. He stated that the septic tank at the Elba Colstant of the septic tank at the Elba Colstant went along this line: lored School was totally inadequate and poured into lines in tremendous quantities that something had to be done about it. to keep them open. (Most of the bills for Since additional units are to be added to Center Chemical Co. are charged against the colored housing project and about the street department for this particular \$3,000 is going to be spent on putting in a item.) septic tank for the project, Mr. Baxley suggested that the money might be used in putting in a sewer line. He estimated the city would have to spend around \$3500 for an adequate septic tank for the colored school. The \$3000 and \$3500 might go a long way toward paying for a sewer line,

The council authorized the mayor to get an engineer to do a survey on this parends at Gardner Clark's corner. The proposed line would go from the corner to C. Y. Martin's house, up Tucker Avenue, over to the Taylor Mill Road and then up to the ored school and housing project.

In closing the discussion a councilman queried if it would be possible for homes on Smith Avenue to be hooked into the sewer line installed in the NASCO subdivision in that part of the city because the situation on Smith Avenue "was a mess." Sooner or later the "roof is going to fall in" on the sewage disposal problem. Stop gap and piece meal measures might ticular line. It could tie into the sewer that get this particular city administration around the problem and maybe the next. But it is safe to prophesy that within the

next decade the point will be reached where something has to be done. It would be a lot better to face up to Then Mayor Taylor remarked that the the problem now with an overall study of done now on a piecemeal basis could be fitted into a 10-year plan for adequate sew-

ing, building, plumbing and electrical codes. map and the regulations and find out what her outing.

OPP BAROMETER HAYWIRE I was startled and greatly alarmed Tuesday morning when the Opp radio announcer broadcast that the barometer was the lowest it had been for several years - 28.6. I looked at the barometer at Hayes Hardware and found it was 29.9. much as two points below 30,

When the barometer falls as buildings commence moving around. The lowest it got during the storm two years ago was 29.5. During the great hurricane in Miami in 1926 the barometer dipped to 28.2, which was the lowest ever recorded in the Uni-

I would suggest that the Opp radio announcer change his lenses or examine his barometer Something must have been radically amiss.

MAY BE RELIEVED

When Leamon LeCompt got ago and hurried over to New Brockton to get a "seat in the saddle on his Uncle Sam's Soil Bank back," he was greatly disappointed—not to say disgusted to find that more than 600 farmers, school teachers, sawmill men, store keepers and white collar workers were at the soil bank office ahead of

When informed that only the first 400 applicants could get in the soil bank deal in Coffee County involving the withdrawal of cotton acreage from planting, he was greatly disturbed. For several days following his New Brockton experience, Mr LeCompte was rather critical of the whole procedure. Now that it looks like all cotton growers who wish to deposit their cotton acreage in the Soil Bank may do so, maybe Mr. LeCompte will stop "pulling his hair" and regain his usual serene composure.

KEEP ON KEEPING ON Yes, I am going to keep on keeping on denouncing the odius basketball rules that are killing spectator interest at the cage games all over the coun-

It has reached a point where most contests develop into a ship, eliminating most of the finer points of the game. Aggressive players are afraid even to touch an opposing player for fear of being penalized. Most referees seem to take DAMS IN WRONG PLACESdelight in calling fouls so closely that it takes much of the interest out of the game. A large majority of the fans don't like
